

Print Cost Scanner RAK

„The Print Cost Scanner is an invaluable tool for our Sales reps“

The new Print Cost Scanner RAK was significantly improved. It discovers printer and MFP in a network and shows Serial-No., meter reads, toner levels and cost of each model in a minute. It works for printer and MFP of all major manufacturer.

The new RAK brings your sales or pre-sales staff in the position to get immediately a picturer about all installed printer and MFP of your targeted customers. It helps to analyse the customers printing environment and cost situation and enables you to develop and submit a dedicated quote for a new printer and MFP installation with less total cost for the customer.

Do it before your competitor is doing it!

The Print Cost Scanner RAK enables Office Machine dealers or service providers for pre-sales or service reasons to analyse the existing office machines like printer and MFP of a customer. It displays beside serial-no. and IP adress also technical status of the machine.

Based on NDA's we are able to get all necessary technical machine information from the major manufacturers. This ensures the implementation even of the latest models. An online update procedure keeps your data base always up to date.

„The Print Cost Scanner RAK is an invaluable tool. Our sales reps can go to a customer site and pull real-time information in a matter of minutes.“

Nate Green, Digix Inc.

Technical Advantages:

- ❖ Extremely easy to use
- ❖ No software or hardware installation required
- ❖ Scans networks of any size in just moments
- ❖ Very compact and efficient Software architecture
- ❖ Data integrates with many third-party proposal generating systems

Hardware Features:

- ❖ Operates via a 256 MB ultra-fast USB 2. thumb Drive
- ❖ Compact form factor that fits easily into all USB ports
- ❖ Unique swivel design ensures that you never lose the cap
- ❖ Works with Windows 2000 and newer
